

Topology-inspired fine-tuning lowers PD distance by 25–31%

Reconstruction-only fine-tuning (the control) makes PD agreement worse, so the gain does not come from fine-tuning alone.

- Pretrained CNN
- Reconstruction-only fine-tuning (control)
- Topology-inspired fine-tuning
- Pretrained level

150/168

fields with all three PD distances lower vs. pretrained (156/168 vs. control)
