

Representative Near-Tie Example

Sample 78: Candidate F Shows Better Persistence Agreement at Similar Conventional Fidelity

Persistence improvement

d_B gain: 37.68%

$W_{2,\infty}$ gain: 32.07%

$W_{2,2}$ gain: 34.10%

minimum PD gain: 32.07%

Conventional fidelity remains close

conventional rank: 13 / 168

$|\Delta PSNR_{uv}|$: 0.5595 dB

relative speed MAE gap: 9.47%

relative speed RMSE gap: 3.55%

Interpretation

Candidate F is conventionally close to CNN, yet all three validated PD metrics favor Candidate F relative to ground truth.
